

Kits for GE F6B / F7EA and F7FA Gas Turbines

TTS Field service outage consumable Kits are delivered in a single watertight container directly to your site - well in advance of your outage start date.

Kits arrive fully stocked, inventoried and all parts bins and locations are clearly marked and labeled. Here is the deal - *you pay for only the parts you use.*

Designed and tested kits are backed by TTS' 30+ year history of servicing gas turbines in the power industry.

Convenience

No need to:

- Place multiple PO's to multiple vendors
- Receive, I.D. and store hundreds of small parts
- To stock excess inventory
- Budget for inventory holding costs.

Along with the Turbine consumable kits we also support:

- Auxiliary System parts
- Fuel Delivery System parts
- Electrical & Instrumentation System parts

TTS' multilingual customer support team provides access to high quality, cost effective spare parts to support both planned and forced outages, as well as normal inventory management.

TTS' Outage Consumable Parts & Tools Kits is just part of TTS Onsite. Our parts management software, Lodestar, helps optimize and track your Capital parts remaining life and repair/replace requirements based on your specific turbine's operating conditions.

Custom Tool Kits

Custom Tool Kits

TTS builds and sells tool kits specific to your requirements.
